

## Technical Sheet – NARA® Bloc "Vanilla" pack of 20

Article number: 110105

### Description:

NARA is a synthetic high- tech, non- toxic monitoring tool for rats and mice.

It is free of allergens and cannot be attacked by insects (flour beetles, saw-toothed grain beetles, cockroaches, etc.) Ideally suited for use in wet areas. No mould formation or decomposition due to moisture. Gnaw marks enable the distinction to be made between rats and mice.

### Application:

We recommend placing it in monitoring stations. You can find a selection of different stations on our website: <https://www.futura-germany.com/product-solutions/stations/>

NARA Bloc has a shelf life of at least three months, depending on where it is used.

Suitable for indoor and outdoor use.

## Technical specifications

Product size / dimensions (in cm):	14 x 7 x 22
Weight (in gram):	140
Dimension of a single NARA (in cm):	2 x 2 x 2,7
Weight of a single NARA (in gram):	5,24
Colour:	blue
Ingredients:	thermoplastic elomer (TPE), aroma, colour
Country of origin	DE
Language of the label:	English (short description in: DE, FR, DK, NL, ESP, IT)
Dangerous Good:	No
EAN Code:	4260538380852
Customs tariff number:	39269097

## Logistical information

Number of products per carton:	12 bags
Carton size (in cm):	31,7 x 23,7 x 16
Weight of full carton (in kg):	2,5

**Other files available:**  
*AIB certificate, MSDS*

CHEESE

**Bad news:** Residues of both rat and mouse poisons are found in fish, boxes, corn cobs and other non-target species all over the world. They are also a threat to food safety, to the unborn child and to a persistent and continuous danger to mammals.

**Good news:** By switching to using NARA® you are changing all this. At the same time legislation and industry standards are following your lead.

So many congratulations. You are contributing to a greener, more professional work centered around IPM based pest management. Also, thank you for working in professional pest control. You are taking care of human health and food security, both vital for our environment and planet. We are proud you use NARA® in your business. Thank you.

The world's renowned rodent experts, the largest service companies and industry associations all believe that IPM means infra-structure improvements, hygiene, monitoring and trapping. The first vital first steps in pest management.

NARA® is soon a pioneer with such organisations as AIB, IFS, BRC and GMP. They support the use of non-toxic rodent monitoring both inside and out, in all weathers and in over 50 countries worldwide.

We're proud of this and you also should be. In some ways this might be a small contribution to conserving our planet, but we believe that the reduced use of poisons and accompanying dilapidation of our sector makes a significant difference.

Did you realise? Most of the profits from NARA® sales are re-invested into the research and development of humane and digital solutions designed to help pest managers work more efficiently and environmentally?

Our belief is that in the next decade our industry will focus on IPM, monitoring, approved humane traps, with digital cameras and sensors in every rodent hole. We'll move further and further away from 'poison'. We don't live in the 1970s, but in the 2020s.

**ENG**  
NARA® BLOC is a high-tech, non-toxic monitoring block for rats and mice. In compliance with IFS & AIB. Disposal: With general rubbish. For further information get in contact with your local waste services.
